

## Status of cases in Ontario

Every weekday at 10:30 a.m. ET, this web page will be updated with the most up-to-date information on the status of cases in Ontario.

The symptoms of the 2019 novel coronavirus, which can include fever and cough, are similar to other respiratory infections, including influenza. As a result, individuals who may simply have the flu are being tested out of an abundance of caution and in line with Ontario's robust detection protocols. This means that most individuals who are tested are unlikely to be infected with the 2019 novel coronavirus.

Confirmed negative <sup>1</sup>	130
Presumptive negative <sup>2</sup>	25
Currently under investigation <sup>3</sup>	39
Presumptive positive <sup>4</sup>	0
Confirmed positive <sup>5</sup>	3
<b>Total number of patients approved for 2019-nCoV testing to date</b>	<b>197</b>

<sup>1</sup>Patient negative based on testing performed at both Public Health Ontario (PHO) Laboratory and National Microbiology Lab (NML)

<sup>2</sup>Patient tested negative at PHO Laboratory but not yet tested by NML

<sup>3</sup>Test results are pending

<sup>4</sup>Patient tested positive at PHO Laboratory but not yet tested by NML

<sup>5</sup>Patient positive based on testing performed at both PHO Laboratory and NML
