		isolated	discharged	Sub-total	being tested	tested negative
As of 09:00, 11 Feb.	3,629	24	4	3,601	865	2,736
As of 09:00, 10 Feb.	2,776	24	3	2,749	809	1,940
Differences	△853	0	△1	△852	△56	△796

- KCDC released the results of epidemiological investigation on 28th confirmed case.
- The 28th case, a 30 year old Chinese female is close contact of 3th case and being self-isolated on 26 January. The case had no onset of symptom(fever) during self-isolated, since she has been taken a painkiller before being isolated.
 - Since the result of test was indicated at the borderline between positive and negative at the Incubation point, the re-test has been conducted. The case tested positive on 10 February and isolated at national designated hospital. And the resident of the contact tested negative.
- Meanwhile, KCDC announces to expand strict quarantine screening to Hong Kong, Macao on 12 February, in addition to those who arrive from mainland China
 - As increased the number of confirmed case in Hong Kong, the spreading of the disease in the community has been identified. And there is a high possibility on the risk of transmission through Macao, nearby Guangdong province.
